Activity Description

Education and Action for Women's Development
 Instituto Para El Desarrollo Economico Central De America Central (IDESAC)

PARTNER PROFILE

IDESAC's main goal is to contribute to structural changes in Guatemala through studying the national reality, formulating economic and social development alternatives, and offering support and services to popular organizations. IDESAC works in both urban and rural contexts, with an emphasis on training local leaders and on the "accompaniment" of local organizations.

IDESAC has consolidated a specific programme area to emphasize work with women. The Women's Programme functions in both the urban and rural areas where IDESAC carries out community development programmes. Horizons is supporting a three-year programme which includes skills training in planning, management and execution of development projects.

Partner Summary
